# WHY CHOOSE CYGNET DENTAL

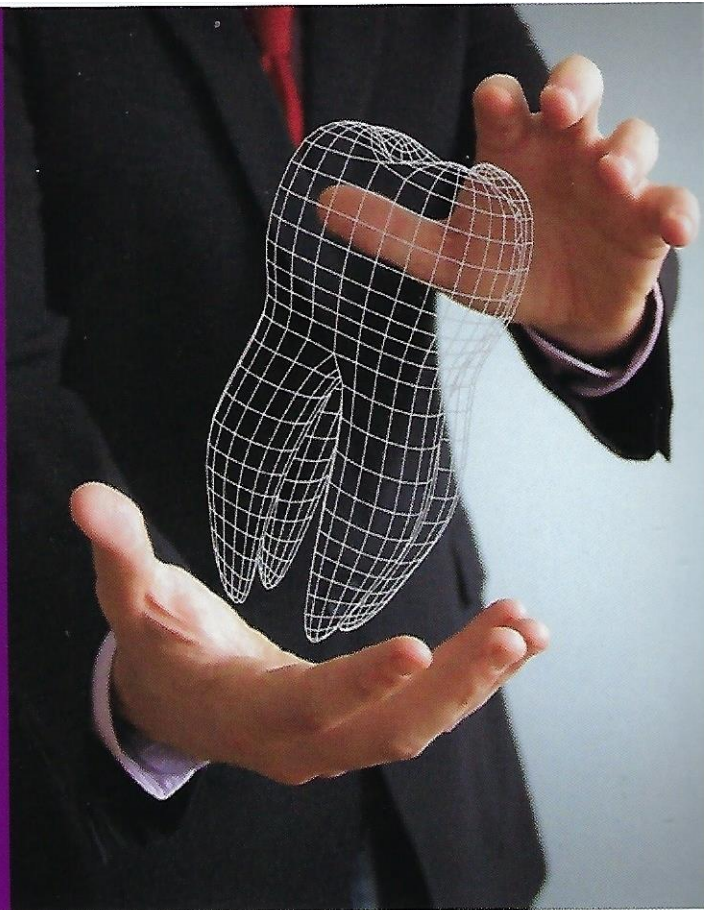

- High Detail Low Dose.
- CBCT Scans Referrals accepted online letter or phone.
- CBCT Scans from only £95
- Scans taken by experienced radiographer.
- Small Field low dose scan for quadrants.
- Free implant planning software

## INDICATIONS FOR REFERRALS

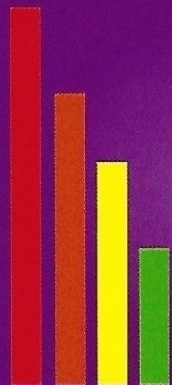

- Endodontics
- Implants
- Complex third molars
- Impacted Canines
- Orthodontics
- Perio bone levels
- Dental Trauma
- Abnormalities

## FEES

- OPG - £50.00
- CBCT - £125 small field (5x5cm)
- CBCT - £175 Full arch (upper or lower jaw)
- CBCT - £225 Both jaws

Our small field 5x5 anterior 3D CBCT scan has a dose of just 5  $\mu$ Sv.

Less than most modern OPGs.

# LOW DOSE

## ANNUAL UK BACKGROUND RADIATION

**2200  $\mu$ Sv**  
**CS81003D SINGLE**  
**JAW JUST 18  $\mu$ Sv**

<b>UK Return flight to New York</b>	100 $\mu$ Sv
<b>New Dual Jaw 3D CBCT Scan</b>	43 $\mu$ Sv
<b>New Single Arch 3D CBCT Scan</b>	18 $\mu$ Sv
<b>New Small Field Anterior Scan</b>	5 $\mu$ Sv
<b>New Small Field Posterior Scan</b>	16 $\mu$ Sv
<b>Digital OPG</b>	11 $\mu$ Sv
<b>Eating 1 Banana</b>	0.1 $\mu$ Sv

The data for this comparison was collated from a number of sources. Average UK background comes from HSE figures on record. All dental comparisons assume current Carestream digital imaging equipment. Small CBCT assumes posterior region where area is more dense and dose is higher, in the anterior region this falls to as low as 5 $\mu$ Sv. Flight data from HPS. Banana from data on file.

The 3D image is acquired simply by standing in an upright position while our scanner rotates 360 degrees around your head. The procedure is completely noninvasive and often uses around 33 times less radiation than a traditional medical CT scan.

The information the scanner gathers about your anatomy makes your dental treatment safer. The scan takes around 10 seconds and if you like you can review your image before you leave. Most appointments average 15 minutes from start to finish.
